Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 21 September 2007.
- 2a) This action is **FINAL**. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-13 is/are pending in the application.
 - 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-13 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on 25 November 2003 is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. In response to the previous office action, Applicant has amended claims 1-12 and added claim 13. Claims 1-13 have been examined.

Drawings

2. The previous objections to the drawings are withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-6, 8, and 10-13 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,636,898 to Ludovici et al.

As per claims 1, 2, 10, 11, and 13, Ludovici discloses the use of a VPN connection manager (the management server) for supervising VPN connections on a

communication network according to a VPN Policy Database (see column 8, line 47 to column 9, line 3). The VPN connection manager corresponds with an Internet security service protocol means such as an IKE Server for handling connection requests (see column 9, lines 14-21). Since the correspondence between the VPNCNM and the IKE Server are networked requests, the IPSEC and IKE Server (as depicted in figure 22) must also be only communicatively connected, since they transact via the VPNCNM.

As per claims 3 and 12 commands for deleting and querying connections are supported (see column 8, line 55).

As per claims 4 and 5, Ludovici discloses use of protocols such as PPP (see column 9, line 24), which use sockets and data structures for communications.

As per claim 6, Ludovici uses standard APIs (i.e. libraries) for interfacing (see column 8, lines 52-61)

As per claim 8, there can be other components (clients) (see column 9, line 23) and both IPsec and ISAKMP can be supported simultaneously (see column 9, lines 24 and 40 and column 1, lines 49-52).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 6,636,898 to Ludovici et al.

Ludovici discloses direct communications between the VPN connection manager and the Internet security service protocol means (see column 9, lines 39-46), but does not disclose the use of a direct connection via a LAN for this connection.

Official notice is given that it is well-known to use out-of-band LANs for management traffic, in order to prevent interlopers from being able to monitor it.

Therefore, it would be obvious to one of ordinary skill in the art at the time the invention was made to connect the VPN connection manager and the Internet security service protocol means using a direct LAN connection, in order to prevent interlopers from being able to monitor it.

Response to Arguments

5. Applicant's arguments filed 21 September 2007 have been fully considered but they are not persuasive. The grounds of rejection have been modified in view of Applicant's amendments, above. As described above, one skilled in the art would reasonably ascertain that the IPSEC and IKE Server may be separate, as their communication goes through a separate server.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew E. Heneghan, whose telephone number is (571) 272-3834. The examiner can normally be reached on Monday-Friday from 8:30 AM - 4:30 PM Eastern Time.
